GAUTHAM KRISHNA R

8075621431 **Palakkad, Kerala** gautham.krishnar61@gmail.com
LinkedIn: linkedin.com/in/gautham-krishnar **Portfolio**: github.com/GAUTHAM21K

PROFILE SUMMARY

Full Stack Engineer specializing in Scalable Backend Systems and Cross Platform Mobile Development. Hands on experience in Agile environments building API driven systems, implementing business logic, and working through complete software development lifecycles via internships and self-initiated projects. Highly motivated to learn modern engineering practices and contribute to secure, scalable production systems as an SDE.

ACADEMIC QUALIFICATION

- Bachelor of Technology – **Computer Science and Engineering**, Ahalia School of Engineering & Technology, Palakkad
  CGPA 8.5 out of 10 **| July, 2026**
- Senior Secondary (Class 12) - CBSE, Palakkad
  Percentage 85% **| March, 2022**
- Secondary Education (Class 10) - CBSE, Thrissur
  Percentage 95% **| March 2020**

EXPERIENCE

- **Software Engineer Intern (Flutter / Backend Integration)** – **Nexotech Solutions Alappuzha** | September 2025 (6 Months)
  Contributed to the development of a production software application following standard SDLC practices
  Collaborated with cross-functional teams to reducing data validation errors by implementing robust error-handling states
  Participated in code reviews, version control workflows, and collaborative debugging
  Play Store Link: https://play.google.com/store/apps/details?id=com.nexotech.salonix.prod

PROJECTS

- **QGuard – Post-Quantum Secure Messaging App |** August 2025
  Type : Academic Project
  Objective : Built a Flutter messaging app with post-quantum cryptography for quantum-resistant end-to-end encryption.
  Technology Used : Flutter, Dart, Python, Post-Quantum Cryptography (Kyber), AES, REST API
  Link : github.com/GAUTHAM21K/QGuard
- **Full-Stack URL Shortener & Analytics Dashboard |** January 2026
  Type : Self-initiated Project
  Objective : Developed a customer-centric robust URL management system featuring custom short-links and a real-time analytics
  Technology Used : Python, Django, PostgreSQL, React, Tailwind, JavaScript,
  Link : github.com/GAUTHAM21K/github.com/GAUTHAM21K/URL-Shortener-With-Dashboard
  Full-Stack Real-Time Project Management Platform | March 2026
  Type : Self-initiated Project
  Objective : Engineered a high-concurrency collaboration platform featuring real-time task lifecycle management
  Technology Used : Django , React , WebSockets (Daphne/Channels), JWT
  Link : github.com/GAUTHAM21K/Real-Time-Project-Manager

CORE COMPETENCIES

- **Programming Languages** : JavaScript, Python, Java, Dart
- **Frontend Technologies** : React Native, React, Tailwind CSS, Flutter
- **Backend Technologies** : Django, Node.js, Express.js, RESTful API Design, Web Sockets
- **Databases** : MySQL, PostgreSQL
- **Tools & Methodologies** : GitFlow, GitHub Actions, Docker Containerization, Postman, Firebase, Agile, Scrum, DevOps, SDLC

ACTIVITIES

- **Codeathon** - Ahalia School of Engineering and Technology | March 2025 - Secured third position
- **CodeSpark National Level Hackathon** - KBN College | August 2025
- **Conscientia Hackathon** - IIST Trivandrum | October 2025
